### Please do not confuse us

We have no connection with any other "Barnes" company. Members of our company are:

> Norman H. Barnes James P. Barnes

### TO OUR FRIENDS

As the close of 1932 draws near, it seems to us that certain conclusions, which were quite evident in 1931, can most certainly be drawn for the future. Apple trees of such varieties as are not desired by the public, and of such age or condition that good fruit cannot be grown are a liability and likely to remain so. Ncarly all of our former old "standby" varieties in peaches (we except Hale and Elberta) are no longer wanted. The sooner such varieties and trees are removed, the better for the grower and his markets. New and better varieties are frequently being introduced. It has been our policy not to propagate such varieties until their value has been pretty definitely determined and while, with peaches especially, better varieties probably will be introduced in the future, we feel that those we offer are as good as can be obtained at present. obtained at present.

In spite of our extremely low prices, we have spared no efforts to have our stock well grown and true to name. The issuing of this abbreviated catalogue does enable us to make quite a saving in advertising, which, together with the fact that we have no salesmen is reflected in this year's low prices.

With many thanks for the good business given us in the past by a constantly increasing clientele, we respectfully solicit your business again, at a time when it will be more than ever appreciated.

### CERTIFICATION

Our experience in the past has been that few people are willing to pay the additional cost of having seals put on to certify trees. However, we are still continuing our practice of having the trees inspected by Dr. J. K. Shaw of Amherst, Mass., nationally known as the originator of identification of apple trees by their leaf characteristics. Dr. Shaw's statement of inspection for Spring 1933 follows:

Amherst, Mass., August 26, 1932.

### TO WHOM IT MAY CONCERN:

Height is only approximate.

This is to certify that I have examined for trueness to name all the salable apple stock now growing in the nurseries of the Wallingford Nurseries of Wallingford, Connecticut, and that, as they now stand in the nursery row, all trees are, to the best of my knowledge and belief, true to name. J. K. Shaw.

### NON-WARRANTY

We strive to avoid mistakes, but in the event that any nursery stock sold by us should prove untrue to the label under which it is sold, provided notice and proper proof are furnished to the seller, the seller shall, at the option of the buyer, either refill that portion of the order which was mislabeled, by another delivery of stock or refund the purchase price. But in any case the seller is not to be held responsible for a sum greater than the original selling price of such stock. All sales or agreements to sell are made subject to shortage of nursery stock from fire, frosts, drought, or other causes beyond control of the sellers. causes beyond control of the sellers.

## APPLICATION OF PRICES

Customers may select 5 of any kind of fruit such as 5 peach at the 10 rate, 35 at the 100 rate, 350 at the 1000 rate.

## MINIMUM ORDER

On account of the cost of handling orders, please make orders for not less than \$1.00.

## DISCOUNT

5% discount may be deducted on all orders where the total amount is remitted with the order and this is sent before April 1st.

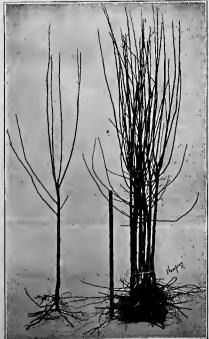

## SIZE OF TREES

Caliper or diameter governs the size of all fruit trees except 1-year apple.

Dear Sirs:
Received the apple trees in good condition and they were fine trees; the best we have bought. Yours truly, Mrs. D. A. Stowell.

## STANDARD APPLE TREES

Permanent apple trees should be planted from 36 to 40 ft. apart. Filler varieties which bear young and canditally such as Weatth, Wagower, Yellow Transparent, or Rome Beauty, and also peach trees where land and climate are suitable, may be planted between, making the distance 18 to 20 ft. The filler trees will carry along the permanent trees so that when it is necessary to take out part, the cost of growing those remaining will have been paid by the younger, quicker bearing varieties.

Two years old 11 in. and up Baldwins.

As the trees begin to crowd, by taking out every other tree, they will be left about 28 ft. apart diagonally and, in later years, again taking out every other tree, will leave them 40 ft. apart. Thus for 25 to 30 years the land will be returning an extra crop before the permanent trees need the room.

We wish also to call attention to our 6-year old apple trees. They have been transplanted, making it possible for us to dig them with good roots. Many of these trees have borne apples in the nursery row, and will save the grower much time. We recommend them especially to home planters. Supplied only in varieties starred.

Exceptions: Dwarf Baldwin, McIntosh, Cortland 12	in cal	10c extra	
Exceptions: Dwarf Baldwin, for continuous,	III. Car	Toc catra.	

Red Strain Delicious in 1 yr. stock only. 10c each extra. \*Baldwin. Large, red, winter apple. Known by all. The only one of the older varieties which the 1925 New England survey showed would not exceed 1925 production in 1935.

\*Cortland. Very similar to McIntosh in flavor. Larger, darker red, ripens two weeks later, hangs to tree better, and well worth planting.

\*Delicious. Large, red, fancy table winter apple.

Bed Strain Delicious. For the flat time w. After the so-called "Blood Red" strain of Delicious, most of which are double worked on McIntosh. This strain is the bright red type, colors early and we cannot too highly

Red" strain of Delicious, most of which are double worked on McIntosh. This strain is the bright red type, colors early and we cannot too highly recommend it. In 1 yr. stock only at 10¢ each extra.

\*Duchess. Striped red. Early August. Following Red Astrachan.

\*Early McIntosh. A cross between McIntosh and Yellow Transparent.

Originated at Geneva Experiment Station, New York. The fruit is very similar to McIntosh in all respects, ripening after Yellow Transparent. Tree is a good thrifty grower and bears annually.

Fall Pippin. Well known Fall variety.

Gallia Beauty (Red Rome Beauty). Generally considered to be the best red strain of Rome Beauty. Most of our trees are double worked on McIntosh. We offer these for the first time at regular prices. In 1 yr. stock only.

\*Gravenstein. Large, striped, red.

Red Gravenstein. (Washington strain.) Originated in the State of Washington—said to be the very best strain of Red Gravenstein, similar to Gravenstein, but a much darker red.

Washington—said to be the very best strain of Red Gravenstein, similar to Gravenstein, but a much darker red.

\*King. A very large, red Fall apple. Fine for table use and baking. Supplied only in 6 yr., 8-10 ft. size.

Macoun. (Description by New York Fruit Testing Association, Geneva, New York.) 1 yr. only, 5¢ each extra.

Just as Early McIntosh advances the season for the McIntosh type of apple, Macoun produces a late crop of these red-skinned, white-fleshed, richly flavored, aromatic apples. The season of Macoun is from one to two months later than that of McIntosh with Cordand midway between. In shape, the fruits of Macoun are similar to those of McIntosh; the color is a darker red, less striped, and with a heavier bloom; the flesh is much the same in color, texture, flavor and aroma. The trees bear regularly and heavily. This promises to be an apple of great merit coming in, as it does, long after all other McIntosh. McIntosh may well be called the King of Apples for New England and vicinity. September.

Melba. One of the newer varicties. Similar to Duchess in season and markings, but better quality and larger.

Milton. (Description by New York Fruit Testing Association, Geneva, New York.)

Milton is a sister of Early McIntosh which ripens its crop a month later. Its main value is that it is a McIntosh type which ripens before McIntosh. The tree is vigorous but not as large as that of Early McIntosh. The fruits are covered with a very pinkish red and heavy bloom. The flesh is white, tender, crisp, juicy, and of McIntosh flavor and aroma.

\*Northern Spy. Well known early Winter, red variety.

\*Opalescent. Very large, red apple. Fall.

Red Astrachan. Best, early red apple. August 1st.

Red Spy. A sport of Northern Spy. Similar in all respects to Northern Spy except in coloring in which it much surpasses its parent, having a solid red.

Red Rome Beauty. See Gallia Beauty.

\*R. I. Greening. Fine dessert variety. Early Winter.

red.

Red Rome Beauty. See Gallia Beauty.

\*R. I. Greening. Fine dessert variety. Early Winter.
Rome Beauty. Late, red Winter apple. Very productive.
Roxbury Russet. Very late Winter russet apple.

\*Stark. Large, red, late Winter. Very productive. 6 yr. trees only.

\*Stayman Winesap. Standard Winter apple in New Jersey. A good variety for late Winter in some sections of New England. Large, red apple.

Wealthy. Fine filler variety. Often bearing fruit in Nursery at two years of age. Red. Late August.

\*Wagener. Great filler variety. Bears young. Red. early Winter.

\*Wagener. Great filler variety. Bears young. Red, early Winter.
Williams Red. Summer apple. Following Duchess.
\*Yellow Transparent. The first early apple of importance. Fine filler

variety.
\*Hyslop Crab. Very productive.

Fitchburg, Mass., February 16, 1932.

Gentlemen: In 1934 I bought from you, fifty, two year old McIntosh red apple trees which were very satisfactory. Yours truly, D. Frank Dillon.

## PEACHES (SPRING DUG)

For several years, we have practiced spring digging of our peach trees. This has always given us a perfect lot of trees which cannot help giving satisfaction. Probably with no kind of fruit is such a radical change of varieties taking place. We are attempting to keep abreast of the times and offer several of the newer introductions, some of them for the first time.

On account of our peach trees being in the field we will not have an accurate grade count until spring, which may make a substitution of sizes necessary in certain instances, but we hope not. Order early and have the trees reserved. Plant 18 to 20 ft. apart)

necessary in certain instances, but we litrees reserved. Plant 18 to 20 ft. apart

## TIME OF RIPENING IS FOR CONNECTICUT CONDITIONS

Greensboro. August 1st. Medium size. White flesh. Very productive. Arp Beauty. August 3rd. Medium size. Yellow flesh. Very produc-Extra fine quality.

Mikado (June Elberta). August 3rd.. Very similar to Arp Beauty but

having a little better texture of flesh. 5¢ extra on 3 largest sizes.

Buttercup. August 5th. Very similar in appearance to Arp Beauty but larger. Yellow and very handsome. 5¢ extra on 3 largest sizes.

Marigold. August 8th. A New Jersey introduction, yellow, semi-free which fills in a season where there is usually a slight break. 5¢ extra on 3

which fills in a season where there is usually a slight break. 5¢ extra on 3 largest sizes.

Oriole. August 10th. A New Jersey introduction, nearly free, yellow and starts to ripen just ahead of Golden Jubilee. 5¢ extra on 3 largest sizes.

Carman. August 15th. Medium to large. White. Very hardy variety. Cumberland. August 15th. Recommended to replace Carman. Practically free, white flesh, dark red coloring, elongated in shape, large size and good quality.

Golden Jubilee. August 13th. Here is the most outstanding introduction of the New Jersey Experiment Station, where for years the state has been breeding and introducing varieties better than those commonly grown. Our own 4-year old Jubilee bore a heavy crop of fruit in 1932 which were a

beautiful sight. The rich golden yellow with handsome red blush, makes them irresistible. Similar to Elberta in general appearance but a brighter golden yellow and slightly smaller average size.

Rochester. August 20th. Yellow, freestone, good quality.

Hiley. August 25th. Freestone, white flesh, handsome red coloring. Eclipse. August 25th. A handsome yellow freestone of New Jersey origin.

origin.

South Haven. August 25th. A very large yellow freestone of Michigan origin. Tree is thrifty and productive.

Belle of Georgia. September 1st. Probably the best known and most popular of white varieties.

Elberta. September 4th. Known to all. King of Peaches.

J. H. Hale. September 8th. Its extra large size, rich golden, yellow color and handsome red cheek, fine flavor, and general attractiveness place it in a class by itself. For several years, Hale on our roadside stand have brought from 100 to 150% more than our best Elbertas.

Brackett. Very similar to Elberta, following immediately after this popular variety.

popular variety.

Lizzie. September 20th. Best of its season. Similar to Elberta, being a chance seedling of that variety. Not quite as much red, but otherwise

This variety and Brackett fill a season which has been badly neglected the past few years, and come at a time when peaches have been selling at about 100% more than earlier old time varieties.

Comparative sizes of our fe, % and fe in. Peach Trees.

Peach Special No. 1. For those wishing a yellow freestone peach with handsome red coloring and shape of Elberta to follow immediately after Golden Jubilee, we offer a few trees this year for the first time. The original tree is a seedling standing in sod uncared for, but its production has been such that we have propagated from it, planted in our own orchards and this year will have a few trees for sale. We have not attempted to introduce the variety nor to give it a name; so when ordering specify Peach Special No. 1.  $5\phi$  each extra on 3 largest sizes.

OUR PATRONS WILL GREATLY OBLIGE US BY USING THIS

Willow, Pussy. Early, large flowering. Lilac. Named varieties, 2-3 ft. @ 50¢.

## EVERGREENS

We offer for forestry, windbreak, or Christmas tree planting, 5 year transplants in the following varieties:

· ·	100	1000	
Norway Spruce, 12-20 in. f	\$5.00	\$40.00	Write
Douglas Fir, 10-18 in.	5.00	40.00	for
Colorado Spruce, 8-15 in.	5.00	40.00	prices on
White Spruce, 10-18 in.	5.00	40.00	5000 or
Austrian Pine, 15-24 in.	5.00	40.00	more
Scotch Pine, 2-3 ft	10.00	75.00	

This picture of Scotch Pine was taken at 4 years of age and averaged 10-18". They are now 5 years and will average 2-3'.

For ornamental purposes, we can furnish about 75 varieties of evergreens in numerous sizes. These have been transplanted every three years, pruned every year, and are first class in every respect—in fact much broader and thicker than the average grade of evergreens as offered by various nurserymen. A special descriptive list of sizes and price list will be mailed upon request.

St. Petersburg, Florida, February 27, 1932.

Gentlemen:

The peach trees you sent last spring to me in Lowell, Mass., have made a fine growth. I think there was only one lost aut of the 400 or more that I banght.

Yours very truly, Charles A. Berry.

White, pink, or red. 35c each.
We also offer 58 named varieties in three year undivided plants at 50c and up, according to variety. Special peony list on request. ROSES

We handle only the best two year plants. They are not to be compared with department store "so called bargains."

35c Each
American Pillar. Single, rosy-pink, large flowers.
Climbing American Beauty. Red.
Dr. Van Fleet. Flesh pink.
Dorothy Perkins. Pink.
Excelsa. Crimson red.
Mary Wallace. Salmon pink.
Paul's Scarlet. Scarlet.
Silver Moon. Pure white. Yellow stamens.
White Dorothy Perkins. White.
Primrose. A new hardy, yellow climber with large double, canary yellow flowers in great profusion. Said to be the most satisfactory yellow climber for the north. 75c each.
Scorcher. An Australian introduction that has created a world sensation. Very vigorous, and hardy, with handsome vermilion flowers, covering the plant in great profusion and a fair repetition in Autumn. 75c each.

Hybrid Perpetuals (Hardy) 40c Each American Beauty. Red.
General Jacqueminot. Red.
Frau Karl Druschki. Pure white.
Harrison Yellow. The old fashioned yellow rose.
Marshall P. Wilder. Red.
Paul Neyron. Pink, very large.
Ulrich Brunner. Cherry red.

Tea Roses (Everblooming) 40c each except as noted Tea Roses (Everblooming) 40c each except as noted Columbia. Vivid pink.

Duchess of Wellington. Intense saffron-yellow, stained rich crimson.

Francis Scott Key. Brilliant crimson.

K. A. Victoria. Pure white. Very fine form.

Mme. Butterfly. Bright pink, apricot and gold.

Mrs. Charles Bell. Salmon, turning to pearly pink.

Mme. Edouard Herriot. Coral red, shaded yellow and scarlet.

Mrs. Aaron Ward. Yellow, sometimes shaded salmon and rose. 50c each.

Pink Radiance. Carmine pink, yellow at base of petals.

Red Radiance. Dazzling, crimson scarlet.

Souv. de Claudius Pernet. Sunflower yellow.

Souv. de Claudius Pernet. Sunflower yellow.

Some Newer Varieties

President Herbert Hoover. Maroon, orange and gold, long pointed buds, rigid stems, and continuous bloomer. \$1.00 each.

Talisman. Orange red, golden yellow and copper red. 60c each.

Charles K. Douglas. A very fine, bright red with scarlet undertone which is becoming very popular. Free bloomer. 60c each.

Betty Uprichard. Brilliant, copper red buds and semi-double, salmon pink flowers stained with copper pink on outside. 60c-each.

E. G. Hill. Large blossoms of deep maroon, velvety inside, glistening outside. Very fragrant. 60c each.

Etoile de Hollande. Dark, velvety crimson. Considered by many to be the finest rose of its color grown. 60c each.

Miss Rowena Thom. Brilliant, satiny pink, shaded with orange. Flame at center. 60c each.

Mrs. E. P. Thom. Fine long buds open into rich lemon-yellow bloom. Vigorous and free bloomer. 60c each.
